

“Freestyle” 37

By Gemini Catamarans

Above shown custom owner furniture

Optional hardtop with full lights and built in speakers

The Gemini Freestyle 37 is a completely new concept in boat design and customization. In a world where flexibility is key, this new design provides the platform on which to build your sailing dreams - tailored however you see fit. Your Gemini Freestyle 37 can be outfitted as a basic family sailing catamaran, a commercial day-charter boat, or maybe your vision includes luxury appointments for relaxation and dining including chaise lounges, an outdoor galley and wrap-around bar. Whatever your idea of the perfect boat is - the Gemini Freestyle 37 is the most flexible and accommodating design available. Of course; her very essence is built upon the most popular cruising catamarans ever built, the Gemini 105Mc and the Legacy 35.

Above shown with doors to cabin and head open

Offering a very low base price, the Gemini Freestyle 37 enables a family and their friends to get out on the water in a similar style to an open picnic boat. Deck furniture is available as modular, built-in sections from the factory, either at initial purchase or as a retrofit. The boat also has an optional full-size, hard top canopy that can be used as a sun deck or a platform for solar panels.

For over 35 years, sailors have lauded the Gemini 105Mc and the Legacy for her unique ability to get a wide range of sailors out on the water to experience the joy, performance and relaxation that only a well-crafted cruising catamaran can deliver. The Freestyle concept fulfills this original intention in entirely new and captivating ways. It's about so much more than checking off options and equipment - it's about dreaming up your ideal sailing catamaran and having the Gemini Freestyle 37 surpass your dreams.

Forward cockpit at sunrise

The commercial day-charter version of the boat consists of seating for up to 32 people. This version is perfect for commercial ventures at resort hotels and vacation spots. To be able to simply get people out on the water to sightsee, snorkel, or just enjoy a day out sailing; the boat is perfect for either single owner/operator charter or a larger venture with multiple boats. The Gemini Freestyle 37 can cater to multiple uses within the day charter business as well; from taking as many people as you want out sailing to catering high-end parties.

One of the biggest advantages of this version as a business venture is the low cost of operation. To be able to simply change out the furniture and the outboard means the boat will always look new. The "green" version that is in development with an electric engine and solar panels will mean even lower cost of actual running as well.
